1

Set up a play store. Put a price on each item. Practice counting the money needed to purchase each items.

Write 3 digit numbers on slips of paper. Put them in order and compare the numbers and expand the numbers.

Using a deck of cards, turn cards over to see how close you can get to 25, 50, and 100.

Skip count by 2s, 5s, 10s. While counting do jumping jacks, pushups, and/or knee raises.

Write 3-digit numbers. Write down how many ones, tens, and hundreds are in those numbers.

2

Add up the ages of everyone that lives in your home. Put them in order from least to greatest. Choose two of the numbers and compare them.

Using chalk, make a number line.

Use coins to draw 5 ways to show \$.23 \$.50, \$.75.

Count how many teeth you have and how many you have lost. Create a word problem using your teeth as the unit.

Using a deck of cards, create two 3-digit numbers. Compare using greater than, less than, or equal. Play this game for 10 minutes.

3

Draw place value blocks. Show two ways to make 314.

Use a string to see how many 2-D shapes you can create.

Write and solve word problems to 100.

Make your own addition flash cards. On the back of each card, write a subtraction fact from the same fact family.

Write a word problem using the following numbers: 37, 24, and 61. Solve your problem using pictures, words, or equations.

4

Find all the mismatched socks. Match the ones you can. Write a word problem about your activity.

Create a clock using a paper plate. Practice telling time with your clock.

Take a shape walk outside and find all the 3D shapes you can: cube, cylinder, rectangular prism, cone

Pick a number and create an array to showing repeated addition. Look for arrays in your house. Such as, window panes or muffin pans.

Draw place value blocks to represent each number.  $\square =$  hundred,  $I =$  tens,  $\bullet =$  ones
